

Kyle Lee is a ceramic artist and instructor with nearly 18 years of experience creating both functional and decorative ceramics. His primary body of ceramic work consists of traditional, elegantly shaped ceramic vases with a high-end, contemporary design aesthetic.

His utilization of bold color combinations and free form painted brush strokes allow him to achieve modernist, contemporary, and abstract surface designs.

Kyle has exhibited his work in solo and group exhibitions and invitationals, both nationally and internationally. His ceramic work can also be found in private collections in New York, Paris, London and beyond.

In April 2021, his work is scheduled to display in the *1000 VASES* exhibition during Design Week in Milan, Italy.
